

**Testing Lab:** TVMDL - College Station      **Client:** Simmons, Larese  
**Case Coordinator:** Carlos Rodriguez      22133 Crown Rd  
**Date Received:** 12/23/2021      Gulfport, MS 39503  
**Report Date:** 12/27/2021      **Owner:** Larese Simmons

## FINAL REPORT

**Medical History:** Medical history on file.  
**Animal ID:** Munji (2152) Goat :: Anglo-Nubian / Male / 9 months / 155 lbs  
**Specimen:** Serum      **Collection Date:** 12/20/2021

## SEROLOGY

**Test:** Small Ruminant Lentivirus (cELISA)<sup>1</sup>

Animals::Specimens	Collection Date	Result	Value
Munji (2152) :: Serum	12/20/2021	Negative	6.014

### Footnotes

- 1:** The VMRD Small Ruminant Lentivirus cELISA detects antibodies against caprine arthritis encephalitis virus (CAEV) in goats or ovine progressive pneumonia/maedi-visna virus (OPPV/MVV) in sheep. The cut-off values for this test are as follows:
- Negative:** % Inhibition < 35%
  - Positive:** % Inhibition >= 35%
